SUMMARY

Aspiring Machine Learning Engineer and Full-Stack Developer with hands-on experience in AI/ML, backend development, web applications, and data analytics. Skilled in building end-to-end scalable solutions using Python, machine learning frameworks, REST APIs, and modern web technologies. Passionate about developing intelligent systems, optimizing backend performance, and contributing to real-world software engineering and AI-driven projects.

EDUCATION

B.Tech in Computer Science & Engineering (AI/ML) 2027
Yeshwantrao Chavan College of Engineering (YCCE), Nagpur

Diploma in Computer Engineering — 87.60% 2024
Government Polytechnic Nagpur (GPN): Maharashtra State Board of Technical Education

SKILLS

Programming Languages: Python, Java, JavaScript, HTML5, CSS3

Frameworks & Libraries: React.js, TensorFlow, Keras, PyTorch, scikit-learn

Machine Learning & basics: Deep Learning, Neural Networks

Frontend Development: Responsive Design, Flexbox, CSS Grid, UI/UX

Tools & Technologies: Git, GitHub, VS Code, npm, MongoDB, PHP

EXPERIENCE- Internship

iBase Technologies: - Frontend Developer June - August, 2025
Built responsive commercial websites using React.js and JavaScript.
Developed interactive and user-friendly UI components.

Widesoftech Pvt. Ltd. :- MERN Developer January-June, 2024
Built a responsive company website with improved UI/UX.
Enhanced website navigation and responsiveness at Widesoftech Pvt. Ltd.

.

PROJECTS

AI in Genomic Gene Sequencing -
Python, TensorFlow, Scikit-learn, Flask, React.js ML pipeline classifying gene mutations into 3 disease-risk categories using CNN + Random Forest. 90%+ accuracy.

Speech Recognition Application –
Python, JavaScript, Web Speech API | 2024 Real-time speech-to-text app with voice command support. Audio processed under 1.5s latency.

IT Company Website — React-based Web Application-
React.js, HTML5, CSS3, JavaScript Multi-section responsive website for an IT startup with dynamic content rendering. 30% faster mobile load time.

Yash Enterprises -
React.js, HTML5, CSS3, JavaScript Responsive e-commerce web app for buyers and sellers with optimized UX. 40% faster task completion.

SmileCheck – AI-Powered Dental Health SaaS Platform –
React. JS, Flask, Python, Firebase, Groq API AI-powered dental screening platform for cavity detection, gum health analysis and personalized oral care recommendations.

COURSES & CERTIFICATIONS

- Coursera - Data Science beyond the basics 2026
- Coursera - AWS Generative AI for Developers 2025
- Coursera - Data Analytics 2025
- TCS-ion - Certification in C, Python 2022
